## **Section I- Montana High School Dropout Rates by Race/Ethnicity Overview**

---

## Introduction

The Montana School Accreditation Standards (10.55.603, ARM) require schools to do follow-up studies of graduates and students no longer in attendance, therefore, dropout data is collected from all public and accredited (by the Montana Board of Public Education) nonpublic schools. Each fall schools report dropout data for grades 7 through 12 by gender and race/ethnicity categories for the previous school year.

The following report provides high school dropout data by county, school, and race/ethnicity for all public and accredited nonpublic high schools. The race/ethnicity categories and dropout definitions are consistent with the requirements of the U.S. Department of Education, National Center for Education Statistics (NCES) Common Core of Data (CCD) reporting, and are provided at the end of this report in the appendices, as well as data collection and dropout rate calculation methodology.

## Analysis of Montana High School Dropout Rates by Race/Ethnicity

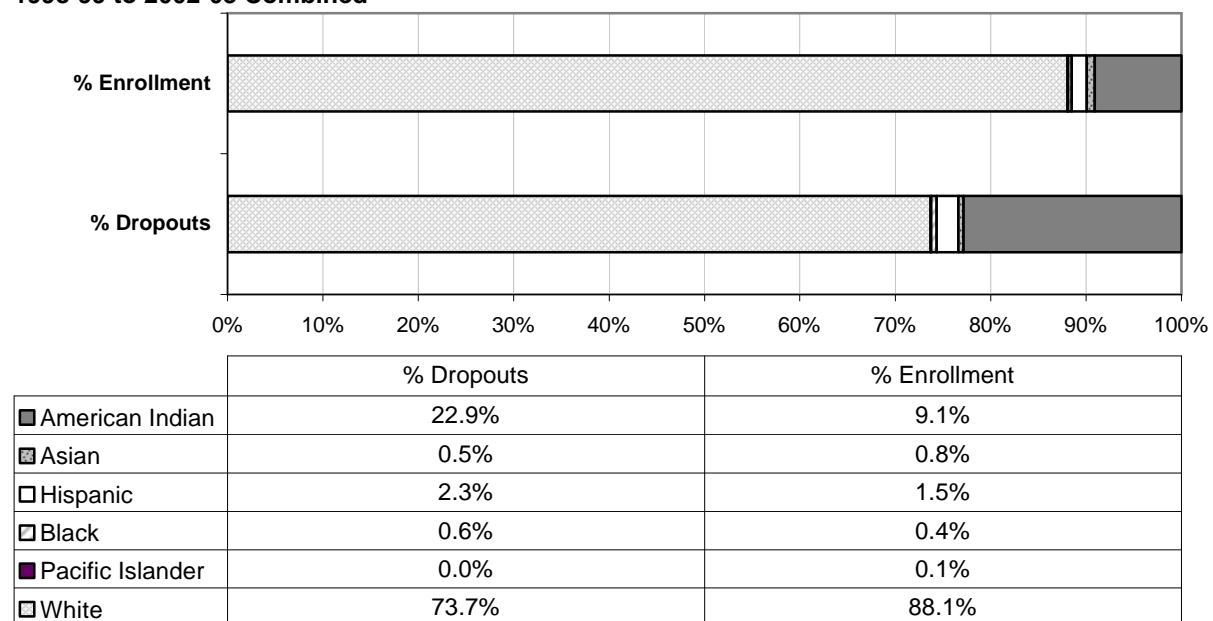

- For the past few years, Montana high school dropout rates, including those for American Indians, have been on the decline, as illustrated in Table 1 on the following page. It is unclear, however, whether this decline is due to improved dropout rates or improved dropout data collection procedures and increased emphasis placed on dropout data with regards to new federal accountability requirements for public high schools.
- Montana has seven Indian reservations and one landless tribe, therefore, the “American Indian” race/ethnicity category represents the largest minority group in the state. During the 2002-03 school year, American Indian students dropped out of high school at a rate 2.6 times that of white students.
- During the 1998-99 through the 2002-03 school years, American Indian students made up a disproportionate percentage of dropouts. American Indians represented 9.1 percent of the total school enrollment for grades 9 through 12, but accounted for 22.9 percent of the dropouts, as illustrated in Figure 1.
- The race/ethnicity categories of Asian, Hispanic, Black, and Pacific Islander accounted for 3.7 percent of the total high school dropouts and 3.3 percent of the corresponding October enrollment. Because the number of students enrolled for these race/ethnicity categories is low, annual dropout rates often vary widely from year to year. An average dropout rate utilizing dropout and enrollment data from multiple years is a more accurate indicator for these small groups.
- Although statewide dropout rates are useful, they can disguise differences observed between various types of schools. Figure 2 shows the distribution of 2002-03 high school dropout rates grouped by whether or not the school is located on or near an Indian reservation. Although schools located on or near a reservation represent 19.4 percent of the schools serving grades 9 through 12, they account for 75 percent of the schools with dropout rates greater than 6 percent. Note, schools with enrollments less than 40 are not included in this analysis.

\* "Native Hawaiian/Pacific Islander" racial/ethnic category added for the 1999-00 dropout data and the 2000-01 fall enrollment data collection. This category was previously grouped with the "Asian" race/ethnicity category.

**Figure 2: Distribution of 2002-03 Dropout Rates for Montana High Schools By School Location**

\*Because small changes in the number of dropouts can cause wide variations in dropout rates for schools with low enrollments, schools with a total enrollment of fewer than 40 students are excluded from analysis.

## Appendix A. Dropout Data Collection and Calculations

### *Dropout Definitions and Data Collection*

Dropout rates can be calculated and reported in three different ways: event rates (snapshot of those who drop out in a single year), status rates (proportion of population who have not completed school and are not enrolled), and cohort rates (a more comprehensive picture which follows a sample group of students over time and generalizes their rate to a larger group). The collection method used in this report is an event rate adapted from the NCES at the U.S. Department of Education and is consistent with the requirements of the NCES Common Core of Data (CCD) reporting.

Montana schools have reported dropout numbers to the Office of Public Instruction (OPI) since 1994-95 using a consistent dropout reporting method developed by the National Center for Education Statistics (NCES). Each fall schools report dropout data for grades 7 through 12 by gender and race/ethnicity for the previous school year. Schools are provided with the *Montana Graduate and Dropout Data Collection Handbook* that provides detailed instructions for determining whether or not a student is considered a dropout. In 2002-03, reports were received from all accredited schools with grades 7 through 12.

### *Calculating a Dropout Rate*

Dropout rates are calculated by dividing the number of dropouts as defined above by the October enrollment total. Dropout rates vary for disaggregated student groups (i.e., race/ethnicity, gender). Calculating and analyzing disaggregated dropout rates is key in determining if certain groups of students are more likely to drop out and can be used in developing and targeting dropout prevention efforts.

**Dropouts** are the count of individuals who:

- 1) were enrolled in school on the date of the previous year October enrollment count or at some time during the previous school year and were not enrolled on the date of the current school year October count,  
*or*
- 2) were not enrolled at the beginning of the previous school year but were expected to enroll and did not re-enroll during the year (“no show”) and were not enrolled on the date of the current school year October count,  
*and*
- 3) have not graduated from high school or completed a state or district-approved high school educational program,  
*and*
- 4) have not transferred to another school, been temporarily absent due to a school-recognized illness or suspension, or died.

### **Dropout Rate Formula**

Dropout Rate = Number of dropouts/October enrollment X 100

Example:

The 2002-03 Dropout Rate for Montana Accredited Schools = 1,910 Dropouts for grades 7 through 12 divided by 74,961 students enrolled in October 2002 multiplied by 100 = 2.5 %

---

### ***Data Limitations***

Because the number of students enrolled for small schools and racial minority groups is relatively low, small annual changes in data can cause wide variations in annual dropout. For example, in a class with 10 students, one dropout would translate to a 10 percent dropout rate. A more realistic indicator of the dropout rate for small schools and racial minority groups is an average of several years.

Montana does not currently have an individual student information system and, therefore, cannot track individuals across schools and school years. The OPI collects aggregate enrollment and dropout counts each fall from schools, which carries with it the risk of misclassification of enrollment and dropout data (i.e., reporting a student's race/ethnicity inconsistently between enrollment and dropout data collections, reporting a transfer student as a dropout).

## **Appendix B. Race/Ethnicity Definitions**

**Race/Ethnicity:** The general racial or ethnic category which most clearly reflects the individual's recognition in his or her community, or with which the individual most identifies.

**American Indian/Alaskan Native**— A person having origins in any of the original peoples of North and South America (including Central America), and who maintains cultural identification through tribal affiliation or community recognition.

**Asian**— A person having origins of any of the original peoples of the Far East, Southeast Asia, or the Indian subcontinents. This area includes, for example, China, India, Japan, and Korea.

**Black or African American (not Hispanic)**— A person having origins in any of the black racial groups of Africa.

**Hispanic or Latino**— A person who traces his or her origin or descent to Mexico, Puerto Rico, Cuba, Central and South America, and other Spanish cultures, regardless of race.

**Native Hawaiian or Pacific Islander**— A person having origins in any of the original peoples of Hawaii or the Pacific Islands. This area includes, for example, Guam, the Philippine Islands, Samoa and Tahiti.

**White, Non-Hispanic**— A person having origins in any of the original peoples of Europe, North Africa, or the Middle East.
